

Awais Jamil

Senior Software Engineer · AI & Agent Tooling · Web & Mobile App Developer

PROFILE

Senior engineer and product-focused builder with experience across health tech, banking, logistics, education and energy platforms. Currently **AI Lead at My Occ Health Record**, designing the agent platform and guardrails that let engineering teams use LLM coding agents consistently and safely. Independently designs, builds and ships native iOS apps, **six of which are live on the Apple App Store**.

EXPERIENCE

Jun 2026 – Present

My Occ Health Record

Melbourne, Hybrid

CURRENT

AI Lead, Agent Harnesses & Developer Tooling

Lead the company's move to agentic-first engineering, designing the internal agent platform, shared skills and guardrails that let developers use LLM coding agents consistently and safely.

- Designed and built an internal agent-harness platform, a single Go binary that provisions, distributes and syncs one versioned set of engineering workflows across five coding agents including Claude Code, Codex and Cursor.
- Standardised the team's delivery process as a library of 27 reusable skills in the open Agent Skills format, covering planning, implementation, testing, code review, release and deployment triage.
- Introduced risk-tiered permissions and approval gates so agents can read freely but need human sign-off to write to external systems.
- Reduced context and token cost by design with on-demand skill loading, token budgets on always-on rules, and a planner and cheaper-subagent model split.
- Built a local dashboard so product, BA and design colleagues can set up and manage their own agent tooling through a guided UI.

Feb 2023 – Jun 2026

My Occ Health Record

Melbourne, Hybrid

Lead Software Engineer

Architected and led front-end engineering for a health-tech platform, building an Angular component library, NX monorepo and company-wide design system while also contributing to the ASP.NET Core backend and DevOps pipeline.

- Architected an Angular Component Library and NX monorepo centralising reusable UI across multiple applications.
- Designed and delivered a company-wide Design System, improving UI consistency and user experience across all products.
- Built and maintained ASP.NET Core backend services using the ABP framework for modular, maintainable architecture.
- Set up CI/CD pipelines and AWS infrastructure to automate build and deployment workflows.
- Led cross-functional delivery working closely with product, design and business stakeholders.

Jan 2022 – Dec 2022

ANZ Bank

Melbourne, Hybrid / Contract

System Analyst / Lead Developer

- Built a highly scalable server-side framework for microservices using Node.js and FastifyJS with OpenAPI 3.0 and Mutual TLS (MTLS).
- Developed a CLI and React-based web dashboard to streamline microservice management and deployments.
- Maintained and enhanced an internal React/Express.js service directory with Elasticsearch for fast discovery.
- Mentored junior developers in code reviews and led agile delivery using Scrum.

Oct 2020 – Jan 2022

WellTeQ

Melbourne, Hybrid

Lead Software Engineer

- Led front-end development of a cross-platform health app in Ionic/Angular (v1), rebuilt in React Native/React (v2).
- Implemented exercise, diet, sleep and weight tracking with external device and service integrations.
- Collaborated with designers and product managers to define requirements; mentored junior team members.

Jul 2019 – Oct 2020

Containerchain
Melbourne, On-site / Hybrid

Technical Lead

- Led development of a web and mobile app for real-time container tracking and driver logistics on port.
- Built a Node.js/Express backend with MySQL and REST APIs, integrated across Angular web and React Native mobile.
- Implemented real-time tracking, scheduling and push notification alert features.

Apr 2017 – Jun 2019

Optergy
Melbourne, On-site / Hybrid

Senior Software Engineer

- Built the Optergy mobile app (Ionic, Angular, Java Spring) and a real-time energy and lighting dashboard (AngularJS, Java).
- Created a BMS programming tool for engineers to design and automate energy management logic.
- Delivered SafetyBeat, a full-stack workforce safety platform (Python Django / Angular web, native iOS and Android apps).

Apr 2016 – Present

YouTube
Remote / Creator

Programming & IT Content Creator

- Produces educational content on programming, software engineering and product-building for a developer community.

Contract

Tulsa Tech / Waukesha
School District
Remote

Frontend / LMS Engineer

- Built a student and teacher progress tracking LMS web app in Angular for Tulsa Tech.
- Developed a custom Blackboard LTI tool syncing courses, enrollments and grades between Infinite Campus (SIS) and Blackboard Learn via REST and ODBC.

APPS ON THE APPLE APP STORE · 2026

Voice Alarm Pro

Alarms played back in your own recorded voice, with a live-waveform recorder, optional passcode gate, per-alarm quiet hours and a one-time Pro unlock.

SwiftUI · SwiftData · StoreKit 2

[View on App Store →](#)

WFH Focus Pro

Focus timer with custom categories, coffee/water logging and break reminders; subscriptions with free trial plus a Lifetime purchase.

SwiftUI · SwiftData · StoreKit 2

[View on App Store →](#)

Five Prayers

Local-first companion for the five daily prayers with Quran reading plans, background playback, offline caching and private progress insights.

SwiftUI · SwiftData · AVFoundation

[View on App Store →](#)

Driver Logbook

Rideshare income and expense tracker with offline-first data, OCR receipt scanning, PDF/CSV export, widgets and iCloud sync.

SwiftUI · Core Data · CloudKit · Vision

[View on App Store →](#)

Aussie Loan Calculator

Mortgage, car loan, personal loan, stamp duty and LMI calculators with amortisation schedules, rate logs and charts.

SwiftUI · SwiftData · Swift Charts

[View on App Store →](#)

FreezerPal

Freezer inventory app tracking food, expiry dates and photos, fully local with no accounts or cloud sync.
